Performance Evaluation Category: <b>REMOVAL PRP - FORD MOTOR COMPANY (ALLEN PARK)</b>			
Description of Contractor Observation By: <b>HERBERT LANGER - The Ford/Allen Park site is the Ford Motor Company's Engine Manufacturing Development Operation (EMDO). Cleaning materials and oil used at the site were spilled into the Reeck drainage ditch which eventually flows into the north branch of the Ecorse River. The TAT prepared a site safety plan; reviewed the EMDO SPCC plan; performed PRP removal oversight including written and photodocumentation; and prepared a letter report summarizing the site activities. Rapid response to site requirements and completion of site activities allowed the site related items and reporting to be done just over 30 days after issuance of the TDD.</b>
